

Line Segment Constructions

Construct a line segment congruent to each given line segment.

1)

Construct a line segment whose length is equal to the sum of the lengths of the given line segments.

2)

Construct a line segment whose length is equal to the difference of the lengths of the given line segments.

3)

Construct a line segment the given number of times longer than the given segment.

4)

2 times as long

Construct a line segment half as long as the given line segment.

5)

Divide each line segment into the number of equal parts specified.

6)

3 equal parts

Construct the perpendicular bisector of each.

7)

Locate the midpoint of each.

8)

Construct a line segment perpendicular to the segment given through the point given.

9)

10)

11)

Construct a line segment through the given point parallel to the given line segment.

12)

Line Segment Constructions

Construct a line segment congruent to each given line segment.

1)

Construct a line segment whose length is equal to the sum of the lengths of the given line segments.

2)

Construct a line segment whose length is equal to the difference of the lengths of the given line segments.

3)

Construct a line segment the given number of times longer than the given segment.

4)

2 times as long

Construct a line segment half as long as the given line segment.

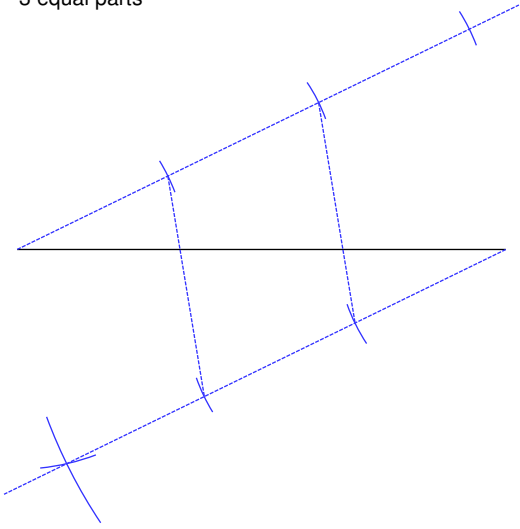

5)

Divide each line segment into the the number of equal parts specified.

6)

3 equal parts

Construct the perpendicular bisector of each.

7)

Locate the midpoint of each.

8)

Construct a line segment perpendicular to the segment given through the point given.

9)

10)

11)

Construct a line segment through the given point parallel to the given line segment.

12)
